

## CUSTOM URL (Domain Name)

Streamline the transition from your microsite to your **Artez** event to create a fully-branded campaign! It's simple – you can change our webpage links (URLs) to something specific to your cause and your event participants and teams will be able to personalise their URLs too.

### Custom URL (Domain Name)

**Standard URL:** <https://secure.artezpacific.com/registrant/startup.aspx?eventid=123456>

**Custom URL:** <https://secure.charityname.org/registrant/startup.aspx?eventid=123456>

### Personalised URLs

Participants and teams can also easily customise their own URLs during registration:

**Standard Personal Page URL:**

<https://secure.artezpacific.com/registrant/FundraisingPage.aspx?RegistrationID=1234567>

**Personalised Personal Page URL:**

<http://www.charityname.org/fundraisername>

### Customised Event Page URLs

You can now set customised URL redirects for your event pages.

**Event Vanity URL:**

<http://www.charityname.org/eventname>

The Event Vanity URL can also be used to create short and memorable links to your Location, Registration, Donation and Search pages.

### Custom Sender Email

You can customise the sender email address to replace the system default email address ([message@artezpacific.com](mailto:message@artezpacific.com)) – with or without a **Custom URL (Domain Name)**. Your Registration Confirmation, Donation Thank You and all other system-generated emails will appear to come from your own email address.
