

CUSTOM URL (Domain Name)

Streamline the transition from your microsite to your **Artez** event to create a fully-branded campaign! It's simple – you can change our webpage links (URLs) to something specific to your cause and your event participants and teams will be able to personalize their URLs too.

Custom URL (Domain Name)

Standard URL: <https://secure.e2rm.com/registrant/startup.aspx?eventid=123456>

Custom URL: <https://secure.charityname.org/registrant/startup.aspx?eventid=123456>

Personalized URLs

Participants and teams can also easily customize their own URLs during registration:

Standard Personal Page URL:

<https://secure.e2rm.com/registrant/FundraisingPage.aspx?RegistrationID=1234567>

Personalized Personal Page URL:

<http://www.charityname.org/fundraisername>

Customized Event Page URLs

You can now set customized URL redirects for your event pages.

Event Vanity URL:

<http://www.charityname.org/eventname>

The Event Vanity URL can also be used to create short and memorable links to your Location, Registration, Donation and Search pages.

Custom Sender Email

You can customize the sender email address to replace the system default email address (message@e2rm.com) – with or without a **Custom URL (Domain Name)**. Your Registration Confirmation, Donation Thank You and all other system-generated emails will appear to come from your own email address.
