

## September 2015 – Release Notes

As part of our commitment to continuously update and enhance our fundraising system, we have recently made the following enhancements to the FrontStream Fundraising Pro platform.

Fixes	
Component	Description
API	Resolved an issue where making a POST to the Constituents method where the IsOrganization was True resulted in the organization name not being saved.
Snapshot Report	Resolved an issue where in some cases the Transaction Source column was reporting the donation as "Data Entry" where the correct value should have been "Participant Entered".
Credit Card Type	Updated the credit card number validation criteria to ensure the card type stored in the database matches the issuer.
Corporate Teams	Resolved an issue where searching for a registrant to assign the corporate team captain would result in a "There are too many results returned" message.
AddThis Widget	Resolved an issue where clicking on the Facebook share icon in the mobile fundraising pages would not pull the Facebook share content defined for the event.
CAPTCHA	Removed the ability to disable CAPTCHA
Card Security Number (CVV)	When creating a new payment gateway Card Security Number is now enabled by default.
