

As part of our commitment to continuously update and enhance our Fundraising system, we have recently made the following enhancements to the Artez Platform.

**Peer-to-Peer Event/Campaign (Beta) –
Unsolicited Donation Page**

**Ability to Resend the Registration Confirmation
Email**

**Custom URLs now work with "www" or
without "www"**

Peer to Peer Template – Peer-to-Peer Unsolicited Donation Page

This is a BETA release. Users may experience issues when using the editor or viewing the live pages. Additional functionality will be added in future sprints.

We are excited to announce our new Peer-to-Peer Donation Page and Editor. This update only includes Unsolicited Donation functionality. Additional pages and donation types will be added in future releases.

The screenshot shows the Artez donation page. At the top left is the Artez logo. The main heading is "Please Donate Now". Below this is a sub-heading "Please provide your contact and payment information below. Your contact information is required to generate an electronic tax receipt which will be sent to the email address that you provide. * denotes required information." and a note "All fields required unless otherwise noted." The form is divided into several sections: "Donation Amount" with a field for "Your Donation" set to "CAD \$0.00"; "Donor Information" with fields for "First Name" and "Last Name (Optional)"; "Address Information" with fields for "Address Line 1" (split into "Home" and "Work" tabs), "Country" (set to "Canada"), "City", "Postal/Zip Code", and "Province/State" (set to "Select a state"); "Contact Information" with fields for "Phone Number" and "Email Address"; and "Payment Information" with fields for "Card Holder Name", "Card Number", "CVV", "Expiry Month" (set to "Select a Month"), and "Expiry Year" (set to "Select a Year"). A large blue "Donate" button is at the bottom of the form. At the very bottom of the page, there are links for "Privacy Policy" and "Français".

Items **NOT** yet added to the donation page: (Will be added in upcoming releases)

- Solicited Donations
- Cover Processing Fees
- Gift Aid functionality
- HEPData Matching Gift functionality
- Suggested Donation Amounts
- Dynamic Suggested Donation Amounts
- Monthly Donations
- Google Re-Captcha
- Permission Questions
- Survey Questions
- Google Analytics
- PayPal donations
- Message to Participant/Team

NOTES:

As the Thank You page has yet to be developed users are redirected to the Event Home Page after a successful donation. It is not advised to use the released functionality for a live donation page as it is incomplete and does not utilize Google Re-Captcha yet.

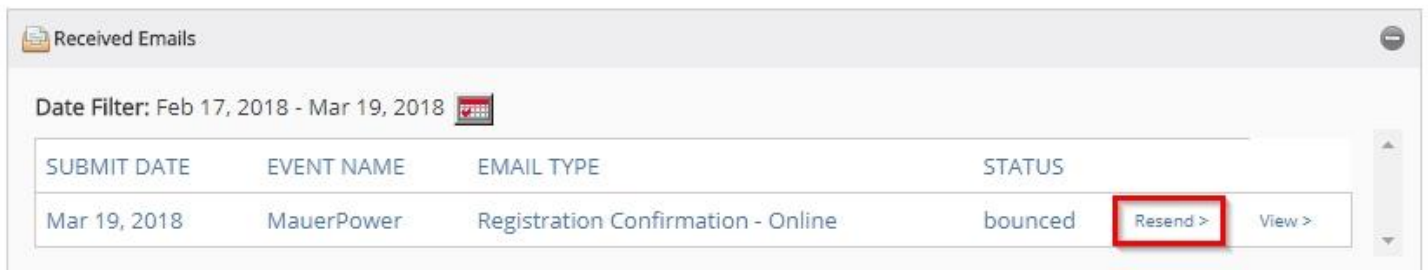

Ability to Resend the Registration Confirmation Email

We have added the ability to resend the registration confirmation email after it was initially sent. This functionality is accessed on the Account Summary page in the Relationships Tab for a Registrant. This functionality has been added for the following email types:

- Registration Confirmation - Online (You've registered online)
- Registration Confirmation - Data Entry (We've registered you, Data Entry)
- Registration Confirmation - Imported (We've registered you)
- Registration Confirmation - Registered By Another (You've been registered by Another)

Here are the steps to resend a registration confirmation email:

- Access the Admin Console
- Click "Relationships"
- Search for the Registrant you wish to resend the email to
- Find the "Received Emails" section on the Account Summary page
- If the initial email was sent more than 30 days prior, then you will need to extend the date range to include the date the email was initially sent
- Click "Resend >" on the registration confirmation email

This will send a brand-new registration confirmation email to the registrant. It will include all current event information and settings. It will not use the event information and setting of the initial email you are resending. This is a new email.

NOTES:

You will need to update the constituent's email address before resending if there was a bounce or if the wrong email address was used.

Custom URLs now work with "www" or without "www"

We have made an enhancement to the custom URL functionality that allows users accessing your pages to include "www" or not and they will still be directed to the appropriate page. If you are interested in using a custom URL please be in contact with your Account Manager.

Bug Fixes

- Fixed an issue with the wrong tax receipt bundle being assigned to copied events.
- Fixed an issue with Corporate Teams with Vanity URLs not showing the Vanity URL in the Relationships Tab.
- Fixed an issue where Corporate Team Vanity URLs would not check to see if a Team already had the Vanity URL in use. System now throws an error message and will not allow this.
- Fixed an issue with Soft Credits causing team fundraising totals to display incorrectly if a team captain transferred fund to a non-team member.
- Fixes an issue where the emergency contact fields, if enabled, could not be made optional.

Important Notice

We will no longer support Transport Layer Security 1.0 (TLS 1.0) cryptographic protocol after 04/30/2018 (April 30th 2018) on Artez. Users utilizing older browsers that do not support TLS 1.1 or higher will not be able to access Artez admin and secure sites. Users need to update their browser to a version that supports cryptographic protocol TLS 1.1 or higher to access Artez secure and admin sites.
